BUY A HOME In the Beautiful MORENO VALLEY

OF COLFAX COUNTY,
NEW MEXICO.

Do you want to own a home in one of the most beautiful and fertile valleys in the Rockies? Do you want to invest in good land while it is cheap and participate in the profits that always follow the development of a new section of the country? Then just address us a postal for information, or call and see us.

We have investigated the possibilities of Moreno Valley fully. We did not plan our money there blindly but we realize the great possibilities latent in that Valley. When good land with sufficient moisture is cut into small tracts and farmed, it increases in value rapidly, as the farmer is the man who demonstrates in the world what a new country will produce. We are selling our lands in Moreno Valley in small tracts to farmers and to people who expect to have it farmed. Now is the time to purchase and participate in the profits, as we expect to sell it rapidly.

When people began to farm in the

Greely district of Colorado, lands they were considered worthless, now they sell for \$250 to \$400 per acre for potatoes to land. Why? Simply because it has been cut into small tracts and developed. Moreno Valley has proven that it will grow as good potatoes as the Greely district under proper tillage and care. If it grew only 1/4th as much, consider how valuable your land will be. The price of land is gauged by what it produces.

We are presenting to you an opportunity to make a valuable investment for yourself, or a good home for your family at a small outlay. The man who hesitates and never acts will always be a wage earner.

It will cost you nothing to investigate.

We are starting these lands at \$20 per acre.

We will sell you the land on monthly payments or annual payments from one to five years at 6 per cent on deferred payments.

Land Company

Measuring the System.

(Continued from 1st page.)

Sixteen thought that the system of part-time school was partly responsible.

Pupils in danger of failing received special advance attention in 66 cities. In Northampton, Mass., for example, Supt. Congdon's monthly reports name each child who is not doing "passing work," give reasons for failure, and tell what special effort is made to improve the pupils' work and what has been done to make the parents acquainted with the facts.

Fourteen superintendents said that they had started a new system of "catch-up classes" for those who failed.

The relation of health to non-promotion is brought out by Supt. Wilson of Decatur, Ill., by a number of questions, such as: "Was the child in ill health? Was he hampered by physical defects? Was he growing rapidly, so that his strength and vitality were all consumed? Was he with pupils so much younger and so different socially that his failure to adjust to their atmosphere and spirit handicapped him? Was he with a teacher who was incompatible? Was he put at a disadvantage by changing schools or teachers two or three times?"

In nine cities the teachers must come to the office of the superintendent and report to him personally the reasons for failure to promote.

All of these answers are hopeful.

They mean that, at last, the boy and girl who fail to pass will not be put off in a corner to fight out battle alone, but that he or she will receive special help and attention—that the day is near at hand when a school system will be measured by the number of non-promotions.

New Mexico State Fair.

Albuquerque, N. M., Feb. 17, 1911.—At a recent meeting of the New Mexico Fair Association, the week October 9-14 was chosen for the next fair, which is to be called the "New Mexico State Fair, 31st Annual."

President Isaac Barth and Secretary-Manager John B. McManus who will direct the destinies of the coming fair, have already aggressively taken hold of the proposition and there is every indication that the Exposition will be on a larger scale than ever before.

The New Mexico Association recently successfully negotiated an arrangement with Colorado Fair Managers, whereby a racing circuit was established to take in Pueblo, Canon City, Lamar, Las Animas, Rocky Ford, Trinidad, and other Colorado towns and Albuquerque.

This racing circuit will mean vastly more attractive running and harness racing, the cooperative plan being a great inducement to horsemen, as they will be provided with a least two months racing, with a prospect for an even break financially, and perhaps finishing up ahead of the game providing their racers are fortunate.

The fair officials this year intend to make a determined effort to advertise New Mexico to the world in a way that has never been done before. Much attention will be paid this year to New Mexico's resources.

A land exposition on quite an elaborate scale will be one of the big features. Visitors will be shown what can be raised on New Mexico soil, and will be given an idea as to the approximate cost of land in various sections, together with the approximate cost for the installation of pumping systems and other improvements.

The Agricultural and Horticultural exhibits will be as extensive this year as possible, and extra efforts will be made to have the different sections of the State send exhibits, and if possible, representatives to encourage visitors to take a look at the farming possibilities offered.

Many new Amusement will be offered this year, including daily flights by aviators. Baseball will be given the usual amount of attention and some of the big league stars will be in on the tournament, which will be open to all teams in New Mexico, Arizona, Trinidad, Colorado, Amarillo, and El Paso, Texas.

work and application are impressed on the boys and a favorite example of the superintendent in talking to them is the case of H. U. Mudge, now head of the great Rock Island railway system who began as section hand on the Santa Fe system and rose to be general manager of the whole system.

THE INDETERMINATE SENTENCE.

The indeterminate sentence is by far the best method in sending boys to the reformatory," said Mr. Kirkpatrick. In many cases the boy is discovered as soon as he arrives to be manageable and inclined to make good and if he feels that his own good behavior will shorten his term it is; whereas when a boy knows that he has to be there a year and can leave at the end of that time, he doesn't care how he acts.

While here the superintendent will visit William Renke, paroled from one to two years' sentence, and who has secured a place at the American Lumber company plant here. Renke is making good. Another who was sent up for a year was paroled recently at the end of nine months and is making good in a position secured for him.

The making of bricks and cement blocks is another industrial feature planned for the school by the superintendent who already has most of the necessary machinery.

"Whatever success we have is largely due to your former fellow citizen B. D. Sampson, assistant superintendent," said Mr. Kirkpatrick. "He is the right man in the place and born for the work."

A Rich Strike in Copper.

A. C. Probert received yesterday a letter from his partner, John B. Bidwell, who has been working the Twining copper property, which makes a great showing, and only goes to prove what has always been believed, that the Frazer copper mines are very rich in high grade copper, and are bound to be big paying properties and among the best and biggest mines in the west.

John Bidwell is experienced in mining and does not get excited without cause, so when he writes that he has a good thing, he has it. In his letter, he says:

"Well, the property here is better than I thought it was. There is a vein in the tunnel 40 or 50 feet wide which carries copper. The tunnel driven through it, partly cross, partly lengthwise went on through a ways, then turned and cut it a second time."

The fact that Mr. Bidwell says that the property is better than he thought, is very significant as he has always said that he would stake his last dollar on this property.

GENERAL BLACKSMITHING

Blacksmithing a specialty.
Fits the shoe to the foot,
not the foot to the shoe.

A FINE VALLEY RANCH FOR SALE

A fine ranch on one of the most beautiful and fertile valleys of the Rocky Mountains, consisting of about 2500 acres of land. Good water rights for several hundred acres, about 2,000 acres tillable, balance fine grazing land. Will cut 200 to 300 tons of meadow hay per annum, worth \$15 per ton.

Land not under irrigation will grow all kinds of small grains, potatoes, garden truck, etc.

Rainfall about 30 inches. Crossed by two permanent mountain streams of pure water. Good hunting and fishing.

12 miles from railroad station. Railroad surveyed through ranch and will likely build in near future.

Would make an ideal farm and ranch home for one desiring such, and would be a very profitable one.

It is also an excellent proposition to cut into small tracts and sell out to farmers. Same kind of lands adjoining are selling at \$20 per acre without water right.

Will sell cheap within the next 60 days.

If you are interested write S. M. Wharton, care Cimarron News, Cimarron, New Mexico.

MATKIN'S

This is only in keeping with the prospects ahead of Taos. Nothing could be more cheering than his great news from the Frazer property at Twining. One beauty about this splendid proposition is the fact that a smelter and concentrating plant are already on the ground and it will take but a few weeks time to get into full operation. There will be no delays in shipping in all this machinery, but actual production could be begun at once. This is an invaluable advantage to any one who operates this high grade mining proposition. —Taos Valley News.

AVISO.

El traspasar dentro del pueblo del W. S. al Condado de Colfax con la mira de casa, paces, recoger fruta silvestre o cortar madera para o para cualquier otro fin sin permiso, se prohibe estrictamente y cualquier que así transgreda será presentado al Jefe de la ley.
